Spanish  Native

English  Intermediate

## SUMMARY

Highly motivated and detail-oriented Computer Science graduate with expirience in developing web and mobile applications. Proficient across a range of technologies including React, Vue, Angular, and Ionic. Demonstrated ability to quickly learn and apply new technologies, including introductory experience with Web3 development using the Wormhole SDK. A collaborative team player eager to contribute to innovative projects.

## PROFESSIONAL EXPERIENCE

**Software Developer | xLabs | May 2023 - May 2025**

- Development of the company's website using Next and Framer motion for the animations.
- Development and maintenance for the Wormhole Portal Token Bridge project, mainly using Vite together with React.

**Software Developer | Rand Labs | Sept 2021 - May 2023**

- Focused on web development for the Algo Explorer project, primarily with React.

**Software Developer | Mipto CA | Jul 2020 - Sept 2021**

- Developed web solutions for the Shareity project utilizing Vue and Yii2 frameworks, JavaScript, CSS3, and HTML5.

**Software Developer | Ozone Technologies | Feb 2020 - Aug 2020**

- Contributed to the development of Ozone, implementing features with React and Three.js.

**Software Developer | DeProinf CA | Mar 2018 - Sept 2021**

- Managed Oracle relational databases and developed mobile applications using Ionic and web applications with Angular, leveraging a NoSQL database.

## EDUCATION

**Bachelor of Science in Computer Science (2022)**
Universidad Central de Venezuela
